About Us

Smarvet d.o.o. characterizes many years of high quality production, which is based on solid furniture such as double rooms, teenage rooms and baby rooms. We are also proud on the fact that we are the only manufacturers of wooden sports equipment in Bosnia &

Herzegovina and that we were suppliers for European and World Championship. Our products are made from the highest quality, materials such as oak, ash, walnut, beech and fir which are FSC certified. For final touches EN standard oils and varnishes that are not harmful to humans and the environment, especially desirable for children's furniture and nursery programs. The idea of our designers is to bring warmth to your home in our collection, in addition to contemporary design and style, it is essential for our furniture to bring a sense of ease and comfort as we feel in our own home.

Bunk bed with Swedish Ladder is designed to encourage sporting activities and proper development of children in today's technologically advanced age when toddlers are tied to mobile and other devices. The bed is on two floors and Swedish ladders are attached to its side. Swedish ladder can be also removed and you can have two separate beds and fix Swedish ladder on the wall.

During our development, we have invested in modern technologies, so we use modern CNC machines to process our products. Since we love wood and have grown up with wood, running between the oak trees and guessing which is older it was important for us to bring all that love in products and to give them uniqueness. That is why are hands of our craftsman our most valuable tool which makes our products perfect. Investing in wood means investing in sustainability, caring for our environment, recycling, renewable abundant and natural materials. When we are selecting timber for products focus is on its quality, local references but also its sustainable origin is taken into account, because this means minimal transport and security that the environment is respected during logging and the future of the forest is guaranteed. You can never find two identical trees in the forest, their rings are growing in a different rhythm and their colors have an infinite number of subtle differences. Wood is the essence of Smarvet products and each one makes them unique.
